

CYMBA Technologies launches CYMBA Silverstone

London, 1st December 2014 – **CYMBA Technologies Limited**, a leading supplier of business software solutions for the Financial community, today announced it has lifted out its **Sell-Side Trading** and **Electronic Execution** platform into a functionally richer stand-alone product. Aimed at Investment Management and Brokerage firms this new product, named **CYMBA Silverstone**, brings to the market an efficient and cost effective trading / execution platform.

CYMBA Silverstone is already utilised by a number of CYMBA's clients as a module within the **CYMBA Athena** platform by the clients' brokerage divisions. It is now offered as standalone Sell-Side focused solution for Investment Management and Brokerage firms. **CYMBA Silverstone** integrates seamlessly with CYMBA's compliance engine (**CYMBA Centurion**), and CYMBA's Buy-Side solution (**CYMBA Athena**) where a client operates both Asset Management and Brokerage divisions.

CYMBA Silverstone provides a cost-effective, flexible and scalable solution for trading both Principal and Agency orders on exchanges.

Features include many of the Order, Position and Execution management features also available within the **CYMBA Athena** platform. Additional features include:

- Support the processing and management of client orders (from the Buy-Side via FIX messages);
- Receipt and display exchange level 1 and 2 order book data. Enabling traders to view the market depth and the position of their orders on the exchange;
- Receipt and display of real time exchange market data (via FIX messages);
- Enhanced quick order entry functionality;
- Where appropriate, Chinese-Wall separation of all operational areas across the firm.

"We have leveraged and extended our proven order management and electronic trading facilities of **CYMBA Athena** to provide a compelling, functionality rich and proven Brokerage platform. We believe the functionality, technology, openness and pricing model of **CYMBA Silverstone** will be welcomed in the market. **CYMBA Silverstone** is already live at a number of leading brokerage firms and we are about to commence on-boarding a number of additional key clients. We are very excited about the range of functionality **CYMBA Silverstone** will deliver to our new and existing clients and to the market in general" said Rodolfo Picciau, **Product Director** and **Founding Partner** at **CYMBA Technologies**.

CYMBA Silverstone is available as a fully integrated application suite and can be deployed either as an ASP or Enterprise Model.
